I pretty well know Liz's schedule but I should clarify that I am not speaking for Dan and his availability. He will likely respond as to his availability.

Cc: Wharton, Steve
Subject: Accepted: QMP discussion--USGS work for Superfund
When: Thursday, April 02, 2015 2:00 PM-3:30 PM (UTC-07:00) Mountain Time (US & Canada).
Where: TBD

Robin - I think this time will work for the UA (upper animas) team as I don't think a meeting with Sunnyside Gold Corporation will happened that day. I have forwarded the email to both Liz Fagen and to Dan Wall b/c I think they can both add to the discussion as to the kind of work that we would look to USGS to assist us with.

Steve Wharton might also wish to attend this meeting.

Thanks.
